DETAILED ACTION

Election/Restrictions

1. Upon review's Applicant amendment filed on October 24, 2004, it is noted that a restriction/election is warranted. Any inconvenient to Applicant is regretted.

2. This application contains claims directed to the following patentably distinct species:

- A. Wherein the first, the second and the third color elements respectively belong to red, green and blue color components (claim 62).
- B. Wherein the first, the second and the third color elements respectively belong to green, blue and red color components (claim 63).
- C. Wherein the first, the second and the third color elements respectively belong to blue, red and green color components (claim 64).

The species are independent or distinct because the Species A, B and C are different embodiments or different color combinations of the first, second and third color elements, respectively.

Art Unit: 3663

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, NO claim is generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
